EXPERIENCE

Lead Experience Design Strategist

Verizon · 2024 – Present

- Led the strategic transformation of the My Verizon app, redefining the top-level dashboard as a pathfinder into deeper account, billing, and device flows, driving a 60% monthly engagement lift and a 4.7-star App Store rating (4.8 on Google Play).
- Operationalized the "Skim, Dip, Dive" framework into a governance model teams used to arbitrate top-level feature placement, protecting clarity across 10M+ ecosystem impressions and 1M+ unique sub-visits.
- Won product and business buy-in by mapping the entire legacy app and website against the framework, screen by screen, replacing opinion debates with evidence.
- Resolved stakeholder disputes with working prototypes instead of slide decks, killing misguided features before they reached production.
- Secured design system exceptions through side-by-side component demos; the customized patterns shipped and were appended to the global library.
- Lead and develop a team of 3 designers, providing ongoing feedback, mentorship, and creative exercises, and coaching them to communicate and grow within a large corporate organization.

Senior User Experience Architect

American Eagle Outfitters · 2022 – 2024

- Led 0-to-1 service design for Buy Online, Pick Up In-Store across digital and store operations, launching to 1,000+ stores in the U.S. and Canada and generating \$51.4M in revenue at an 84% fulfillment rate.
- Replaced the failing Reserve, Try, Buy program (69% abandonment, 223K uncollected units) with an end-to-end pickup experience grounded in shopalongs, associate interviews, and a five-layer service blueprint.
- Aligned 20+ stakeholders across 9 teams on one unified direction; piloted in four stores ahead of holiday and converted live operational feedback into shipped design fixes.
- Pitched and built a zero-budget conversational FAQ that cut chat contacts 18% and total contacts 8% at \$5.00 saved per deflected chat, securing funding for a fully integrated in-house assistant.
- Led 2 UX designers with direction, feedback, and oversight while partnering directly with the CTO and SVP of E-Commerce.

SKILLS

Product Strategy

Experience Strategy

Service Design

Design Systems

AI-Augmented Design

Agentic Product Design

Conversational UX

Information Architecture

Customer Journey Architecture

Governance Frameworks

Product and Interaction Design
